Immunization Reporting

The Kentucky Health Information Exchange (KHIE) serves as the data intermediary in Kentucky for healthcare providers seeking to electronically submit patient immunization data to the Kentucky Immunization Registry. Immunization data submission through KHIE counts toward Measure 1—Immunization Registry Reporting for Meaningful Use.

What KHIE Needs

- ⇒ Signed KHIE participation agreement and Immunization Registry Authorization addendum
- ⇒ Immunization data feed containing Unsolicited Vaccination Record Update (VXU) messages
- ⇒ HL7 version 2.5.1 messages (HL7 2.3.1 is also supported)
- ⇒ CVX or CPT codes representing the substance administered

How it Works

KHIE will automatically forward VXU messages received on the Immunization data feed to the Kentucky Immunization Registry. Providers and hospitals wanting to view and print patient immunization history can request access to the Kentucky Immunization Registry portal.

EHR Incentive Program participants must utilize ONC 2014 CEHRT to generate and send immunization data to KHIE.
